

Smoking:

The Mozambique government recently regulated all tourism lodges and self catering establishments as **NO SMOKING** areas. Therefore, please refrain from smoking inside the cottages as some of our guests recently had to pay hefty fines for transgressing the **NON SMOKING** regulations.

Water:

Paradise Dunes water supply is from a private bore hole. During busy times and long periods without rainfall, water can be in short supply. Please use it sparingly at all times!!

The water may sometimes appear slightly brown in colour and have a strange odour. This is due to a low water table and the Casava plants growing in the area.

The water is still safe for use, but we recommend using bottled water for human consumption.

Septic Tank:

The cottages makes use of septic tanks, please ensure no foreign objects are thrown in the toilet.
